

Dual Mode of Alcohol Dectctor (Sensing & Measurement): AL-6000

Introduction:

AL-6000 is the dual mode of hand held , portable breath alcohol tester to check sensing & measurement.

- 1) Sensing Mode: Zero, Low, High
- 2) Measurement Mode from 0.00 to 0.40% BAC (0.00 to 4.00 g/L)

by Digital LED display

To check subject's breath alcohol concentration with high accuracy.

Specifications :

Category	Contents
Indication	0.00 to 0.40% B.A.C. or 0.00 to 0.40g/L or mg/L equivalent by LED display
Measurement Mode	Normal Mode: 0.00 to 4.00 g/L (0.00 to 0.40 %BAC) [0.00~4.00g/L or 0.00~2.0mg/L] Fast Mode: Zero (0), Low (Lo), High (Hi) [Level can be adjusted at the customer's request.]
Sensing Mode	Zero, Low, High
Warning Up	Below 20 Seconds
Response time	within 5 seconds
Recycle time	10 seconds
Sensor	Semiconductor type alcohol sensor(Gas flow sensor built-in)
Power supply	Two 1.5V "AA" Alkaline batteries
Weight	105g (Including batteries)
Dimension (mm)	59 X 116 X 27
Remark	Auto power off ,Battery Low indication

*If you need exact test result, AL-6000 is the best recommended BAT.
